SLIGHT CHECK ON DOWNWARD MOVE

[By Associated Press.]
NEW YORK, Nov. 13.—A check was made upon the downward movement of prices today after running somewhat further in the early part of the day. The rebound today was narrower than the downward reaction yesterday and the market became lethargic in the latter stages. This narrowing of the swing of the price movement is usually a sign of its apt condition of more or less stable equilibrium which drifts with feeble fluctuations until getting new initiative from some fresh developments in the situation. Such a period of quietude would be welcomed at the present by all the most important interests concerned in the market. There was evidence yesterday and early today that professional operators were disposed to take advantage of the neglected condition of the market to undertake bear tactics. Means seem to have been found also to place an obstacle in the way of these attempts.
